NYLIX

AN AI TEAM, RUN BY NYLIX AI FOR YOUR COMPANY

AN AI TEAM THAT RUNS YOUR OPERATIONS.

An AI Manager and AI members for business development, marketing and social media, working in your team's Telegram group. Every working day they read your CRM, your inbox and the web, plan the day, give your people tasks with deadlines, follow up and report back. Nylix AI sets it up and runs it for you.

4	Daily	Telegram	Managed
AI members to start, each with its own bot in your group	Plans, tasks with deadlines and follow-ups, every working day	and WhatsApp, where your people already work	Set up and run by Nylix AI. Nothing to install

THE MEMBERS

YOUR AI TEAM

AI

AI Manager

Plans the day, assigns tasks with deadlines, follows up on overdue and blocked work, and reports to the team.

AI

AI Business Development

Researches prospects, adds leads to your CRM and writes a personalised first email for each.

AI

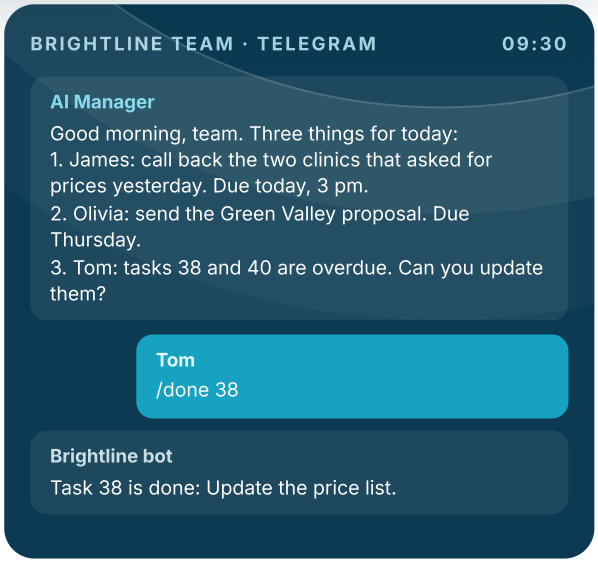

AI Marketing

Watches your pipeline and your market, and suggests what to promote.

AI

AI Social Media

Writes posts for your team to review and publish.

THE DAILY LOOP

WHAT HAPPENS EVERY WORKING DAY

Each AI member runs on a schedule. It reads your sources, plans, hands work to your people and follows up, and the next day it starts again from what changed.

1. **Signals in**
   Your CRM, your inbox and website enquiries, the team's chat, and the web for news and prospects.
2. **AI members plan**
   Each member reads its sources, plans the day and decides what needs a person.
3. **Your people act**
   Tasks with deadlines arrive on Telegram or WhatsApp. Anything for a client waits for a person's approval.
4. **Follow-ups**
   Overdue and blocked work is chased in the group, and tasks are closed with a short command.
5. **Weekly results**
   What got done and what is next, reported to the team.

↻ And again the next working day

YOUR TEAM ANSWERS FROM TELEGRAM

YOUR PEOPLE STAY IN THEIR CHAT

Each AI member has its own Telegram bot in your team's group. Your people reply there, in plain words or with a short command.

Accept or close tasks
A short command marks a task done or blocked.

Ask a question
Tag a member. It answers from your CRM and your tasks.

Ask for a lead list
Web research on request, sent as an Excel file.

Move deadlines
Change a task's day or owner by asking.

Set the team's focus
Every member puts this week's goal first.

We run Nylix AI this way. Our own team gets its plan from its AI manager every working morning.

AI BUSINESS DEVELOPMENT

BUSINESS DEVELOPMENT THAT FINDS ITS OWN LEADS

Every morning it researches new companies that fit, adds them to your CRM and writes each one a personalised first email. Then it tells the team what it did.

01 Researches companies that fit
In the sectors and countries you choose, using only contacts each business publishes.

02 Skips anyone you already know
Every prospect is checked against your CRM first.

03 Adds the new leads to your CRM
With the website, the contact and why each one fits.

04 Writes a personalised first email for each
Short, in the lead's own language, signed by your teammate.

05 A person approves it, or your CRM sends it
Or your CRM's autopilot sends it within your limits: a set number a day, in your sending hours, with unsubscribe and do-not-contact built in.

From James, Brightline
To hello@brookfielddental.example
Subject WhatsApp bookings, answered for you

Hi Dr. Hughes,

I saw that Brookfield Dental takes most of its bookings by phone and WhatsApp. We help clinics answer those messages in seconds and fill the diary, even after hours.

Would a 15-minute call next week be useful?

James

WHAT IT READS

IT READS WHAT YOU CONNECT, AND REMEMBERS YOUR RULES

Nylix CRM · Nylix Inbox · Website enquiries · Your Telegram group · The web · Google Workspace · Notion · Slack · HubSpot · Any system with an MCP server

A memory of your company

Each member keeps the rules you give it and the lessons it learns from your team, and reads them before every run. It uses your systems' tools, never the keys.

GUARDRAILS

YOU STAY IN CONTROL

Only your own team
Messages go only to your employees and team group, never to clients.

A person approves what goes out
Anything for a client is a draft, sent by a person or by your CRM within limits.

Limits and quiet hours
Daily caps on tasks, messages and emails, and quiet hours.

One pause switch
Stop the whole AI team at once. A paused run shows what it would have done.

Every action logged
Each task, message, email and change is in a log you can read.

Secrets stay on the server
Your keys and tokens are encrypted on the server.

RUN BY NYLIX AI

A MANAGED SERVICE, NOT SOFTWARE TO INSTALL

01 We talk
Your company, your team and what the AI team takes on first.

02 We connect and set up
Your systems, your group, each member's job and schedule.

03 The team starts
We watch the first runs with you and give the members your rules.

04 You adjust as you go
Set the focus from the group; we change rules and limits on request.

ALSO FROM NYLIX AI

NYLIX inbox
Customer chats from WhatsApp, Instagram, Messenger, Telegram and your website in one shared inbox.

NYLIX bots
AI that answers customers day and night, qualifies leads and books, then hands over to a person.

Custom software
CRMs and management systems, integrations, websites and apps, computer vision and dashboards.

TRUSTED BY BUSINESSES

6+ countries · **15+** businesses served · **8+** industries
